

CUSTOM SOFTWARE SERVICES

Software Development Services from Concept to Reality!

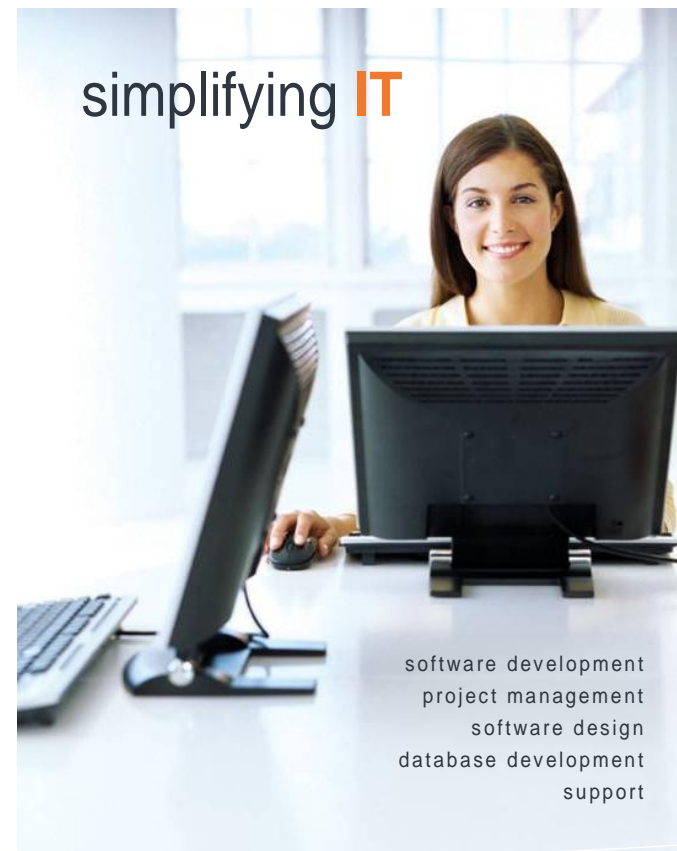

We assist companies to implement business ideas with increased efficiency and effectiveness.

The typical software project requires many different skill sets, but this shouldn't be your problem. In most instances, we have all the talent needed to define, design, develop and deploy a sophisticated custom software application. We're a one-stop software development shop.

Whether you need enterprise-scaled software, a smart web application, a customized software development solution, or other assistance to turn your vision into reality, we are able to assist you!

Some example systems include, but are not limited to:

- Direct Marketing Administration Systems.
- Recovery Management Systems.
- Customer Relationship Management Systems (CRM).
- Workflow Management Systems.
- Business Management Systems.
- Systems & Data Migration.
- Geographical Surveys & Baseline Studies.

DEVELOPMENT SERVICES

We provide software development services for companies of any size. Areas of expertise include building custom software for leading companies within a variety of industries. At Ngale Africa, we develop customized software that enables companies to implement business ideas in a more cost effective and time saving manner with added value. Our developed solutions bring down company costs, increases productivity and add value to business.

OUR FOCUS

We strive to give companies cutting edge solutions, as we use the most efficient, flexible and cost-effective approach to software development. To date, we have created a diverse portfolio of work which ranges from simple client databases to highly specialized systems. Our software solutions and systems are specialized per clients' needs in terms of each company's own unique business structure.

CUSTOM SOLUTIONS

We offer full cycle custom software programming services, from Concept to Reality.

WEB SOLUTIONS

The main core of our business development applications have been web development services (web applications). The web is a big part of software development today. With a range of comprehensive web projects under our belt - if you have a web project, we are able to help you.

EBUSINESS SOLUTIONS

To design the optimal web and desktop solutions, we need to share your vision of the project. Our job isn't to build the system we want. We are here to understand what you want and then make your vision a reality.

WE'VE WORKED WITH A DIVERSE CUSTOMER BASE. HOW CAN WE HELP YOU?

Our goal is always to provide companies with customized software solutions developed with cutting edge technology.
